SEEQUENT

IMAGO

From image capture to geological interpretation

Discover the power of Imago today

Visit **seequent.com** to explore Imago product videos, customer success stories, or request a live demo.

Capture

Capture core trays and field imagery through desktop and mobile workflows.

Organise

Automatically name, index, and associate imagery with drillhole, depth, and project metadata.

Manage

Store current and historical imagery in a secure, searchable cloud environment.

Analyse

Use Image Analysis to automate image processing and generate quantitative, AI-assisted outputs.

Integrate

Bring imagery into Leapfrog, MX Deposit, acQuire, Evo, and other geoscience applications.

Validate & preserve

Compare imagery with logs, assays, and models while maintaining a traceable geological record.
