

INVESTOR READY BY DEFAULT

Technology that
builds mining
investor confidence

Deliver the return that matters

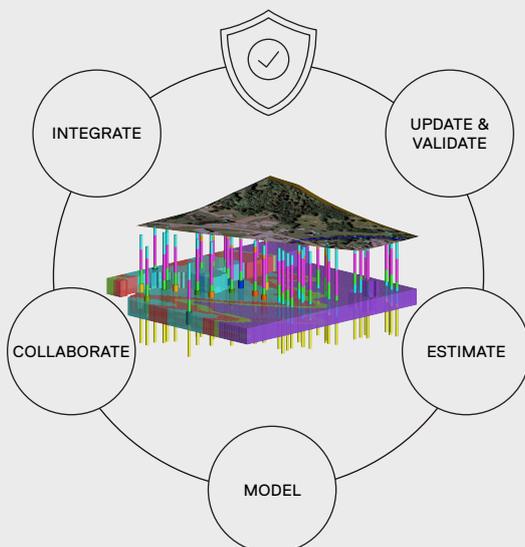

Early-stage mineral exploration can deliver big rewards, but it's also risky.

Investors are cautious and more selective than ever, seeking projects built on proof, not promise

Industry-backed technology turns exploration projects into credible investment opportunities with accurate data and solid models

Build investor trust today

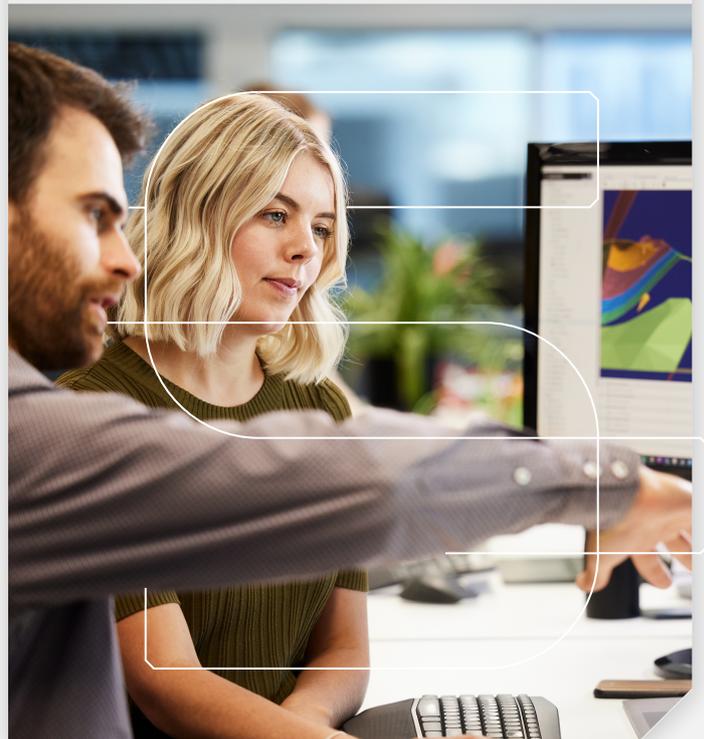

- ✓ Validate and clean drillhole data
- ✓ Track changes and model versions creating an audit-trail
- ✓ Enable fast, accurate model updates in 3D
- ✓ Use live geostatistics to define assay trends
- ✓ Build the next phase of drilling targets based on robust geological understanding

Reliable and credible – from day one

Integrated workflows help you communicate insights clearly and confidently.

Data-backed decisions that are auditable, transparent and compliant, earn investor trust.
