

SEEQUENT EVO Q&A

Lyceum 2020

What is Seequent Evo?

Seequent Evo is a connected ecosystem of solutions which enable you to work seamlessly across your workflow, in order to solve problems in the moment.

Seequent Evo encompasses our existing and future desktop applications, cloud applications, APIs and micro-services. These are all underpinned by our 'Seequent Engine' which includes things like Seequent ID, billing and storage.

It is not a single platform or solution in itself; it is an evolving ecosystem. Seequent Evo will enable seamless connections across Seequent solutions, as well other world-leading geoscience and engineering solutions and services.

Seequent Evo is not just for geoscientists and engineers – it's for data scientists, IT managers, developers and stakeholders.

Seequent Evo will evolve with your needs.

QUESTION	ANSWER
<p>Why is Seequent focusing on Seequent Evo?</p>	<p>The challenges we are facing as an industry are becoming more and more complex. You need a personalised experience, and 'one-size-fits-all' products and solutions are no longer as relevant as they create siloed workflows and inhibits collaboration. We are responding to your changing needs.</p>
<p>Will you continue to work on your desktop products?</p>	<p>YES! Our desktop applications represent an incredibly important part of Seequent Evo. We have just invested a huge amount of time and resource into updating our code base to ensure it is future focused, and we will continue to invest R&D into these solutions. You can find out more about this in our product Solution Zones. We are building Seequent Evo in a way which enhances our desktop users experience and functionality.</p>
<p>When will I be able to access Seequent Evo?</p>	<p>Seequent Evo is not a single platform or solution. Seequent Evo encompasses our existing and future desktop applications, cloud applications, API's and micro-services. There are some Seequent Evo solutions available today – such as Seequent Central. We are currently focusing on developing our API's and micro-services to provide more exciting functionality soon.</p>

QUESTION	ANSWER
<p>I want to join Seequent's partner network and connect with Seequent Evo. How do I do that?</p>	<p>Seequent is always looking to better solve geoscience problems through collaboration. Seequent's open philosophy aims to ensure geoscientists have a seamless workflow across every aspect of their project. If you're interested in partnering with us, please visit the partner page on our website – www.seequent.com/partners and contact us via the form.</p>
<p>Can I request functionality?</p>	<p>Seequent solutions have always been built on customer feedback and industry insight. If you'd like to talk to us about specific functionality, please contact us at seequent.evo@seequent.com.</p>
<p>Where can I learn more about Seequent Evo?</p>	<p>If you'd like to know more about Seequent Evo, please contact your local Seequent agent or email us at seequent.evo@seequent.com.</p>

What's next?

Our solutions are built for you, to meet complex challenges you face. Many of you have been on this journey with us since the beginning, and we look forward to continuing with you into the future.

We will continue establishing building blocks to enable a connected geoscience ecosystem – Seequent Evo. It will continue to evolve.
