

Target for ArcGIS Pro 2026.1

new release

## Target for ArcGIS Pro 2026.1 Release Notes

Target for ArcGIS Pro brings advanced understanding of drillhole and subsurface data to the Esri ArcGIS Pro environment. Easily import and visualise your data, share your knowledge, and make discoveries faster using the ArcGIS Pro tools you're familiar with. This innovative and intuitive Esri-integrated solution allows you to make timely decisions on project viability and choose from hundreds of ArcGIS Pro geoprocessing tools to perfect your analysis.

## Changes in Target for ArcGIS Pro 2026.1

Target for ArcGIS Pro 2026.1 makes interpreting and communicating your drillhole and subsurface data easier. We have now enabled support for ArcGIS Pro 3.6.

### System Requirements

Target for ArcGIS Pro has the same system requirements as ArcGIS Pro and can be run on the supported version, ArcGIS Pro 3.6.

### Upgrade Recommendation

For users who have Target for ArcGIS Pro 2024.2 installed, we recommend the following steps:

1. Uninstall Target for ArcGIS Pro 2024.2.
2. Uninstall ArcGIS Pro 3.4.
3. Install ArcGIS Pro 3.6 through the ArcGIS Pro installer.
4. Install Target for ArcGIS Pro 2026.1 using the installation file available from the download link on the Products page for the 2026.1 release ([my.sequent.com/downloads](https://my.sequent.com/downloads)).
